<b>Priority</b>	2	

**Section** NA

**Page** CG-9

**Figure Table** NA

**Category Name** Interfaces

**Actionee** HAIS

**Sub Category**

**Subject** Data Availability Notices from TSDIS

**Description of Problem or Suggestion:**

The ingest subsystem requires DANs from external interface systems to initiate the data ingest process for ECS. This is a new requirement, and although reflected in the ICD, it is not reflected in the IRD for TSDIS.

**Originator's Recommendation**

Revise the IRD between ECS and TSDIS to reflect the new requirements.

**GSFC Response by:**

**GSFC Response Date**

**HAIS Response by:** Eisenstein

**HAIS Schedule**

**HAIS R. E.** D. Foch

**HAIS Response Date** 5/16/95

The TSDIS IRD does not include an explicit requirement for the Ingest Subsystem to receive a Data Availability Notice (DAN) before ingesting data from TSDIS. The DAN has been specified in the ICD as an implementation of the IRD requirements for ingest. Ingest designer view the DAN as desirable for efficient ingest via this interface (and other external interfaces). The DAN and other messages in the TSDIS ICD are appropriate and desirable implementation-level information for the external ICDs.
